| 3" to 10" | | | ** | ** | ** |

* Per Fee Ordinance Section VI, combined domestic and fire service connections are subject to the connection charge based on the meter size for the combined system, except the basic charge shall be collected for combined systems, up to a maximum one-inch (1") meter size, for single family and duplex housing units with fire sprinkler systems approved by the appropriate fire department and installed in accordance with applicable building requirements. Contact the Zone 7 office with any additional questions.

** Connection fees for meter sizes 3-inches and above will be determined by using the fee factor for maximum rate for continuous use.

Fees for meters other than those listed above will be determined based upon the AWWA maximum continuous flow rating for the brand, type, and size of meter.

These fees are based on the Maximum Continuous Flow Rate through a 5/8" meter as defined by AWWA C700 for Cold-Water Meter -- Displacement Type, Bronze Case. Any changes to meter capacities will affect the above connection fees.
